Bibek Kumar Sahani

+977-9860679878 | Pepsicola, Kathmandu-32 | bbeksahani@gmail.com | LinkedIn | GitHub

Career Objective

Foundational Knowledge in networking, cybersecurity, and cloud technologies, backed by hands-on internship experience in network infrastructure, IP surveillance systems, and hardware troubleshooting. Proficient in routing, switching, VLANs, and network monitoring tools including Cisco Packet Tracer, GNS3, Wireshark, and Nmap with practical knowledge of cloud networking through multiple AWS certifications. Committed to ensuring secure scalable, and efficient network operations while continuously learning and adapting to emerging technologies. Aims to contribute to team success through technical expertise, problem-solving, and collaboration.

Educational Background

BSc (Hons) Computer Networking & IT Security **2023-Present**

- Islington College
- London Metropolitan University
- Kamal Marg, Kamalpokhari, Kathmandu

School Leaving Certificate (SLC) **2020-2022**

- DAV College
- National Examinations Board (NEB)
- DAV Complex, Jawalakhel, Lalitpur

Secondary Education Examination (SEE) **2020**

- Lyceum Paradise Academy
- National Examinations Board (NEB)
- Pepsicola, Townplanning, Kathmandu

Internship Experience

Network Support Engineer Intern **Sept 2025 - Dec 2025**

Bhusal Tech Traders Pvt. Ltd, Bhaktapur

- Diagnosed and resolved network and hardware faults using structured troubleshooting, cable testing, and ping/ traceroute diagnostics, reducing recurring connectivity issues by approximately 20% across client sites.
- Performed OS installation, driver configuration, and system hardening on client workstations, documenting procedures to support consistent knowledge transfer.
- Verified LAN connectivity and bandwidth allocation across network segments, ensuring stable performance and uptime for client infrastructure.
- Assisted senior engineers with preventive maintenance and infrastructure upkeep, gaining hands-on exposure to enterprise network environments.
- Supported client-facing technical troubleshooting, isolating root causes for connectivity and hardware issues under time constraints.

Skills

Soft Skills

Time Management | Communication Skills | Adaptability | Problem Solving | Fast Learner | Work Ethics | Critical Thinking

Technical Skills

Offensive Security	Penetration Testing, Ethical Hacking, Burpsuite, Metasploit, Hashcat, Kali Linux, OWASP DVWA
Defensive/ SOC	Threat Detection & Mitigation, Log Analysis, Wireshark (Traffic Analysis), Nmap, Incident Response basics
Frameworks	ISO 27001, NIST SP 800-53, CIS Controls, Risk Analysis, IS audit, Ethical & Legal Compliance
Networking	TCP/IP, OSI Model, VLANs, Subnetting, DNS, DHCP, NAT, Routing Protocols
Cloud Security	AWS IAM, VPC, security groups, CloudWatch, CloudTrail, AWS Security Foundations
Systems	Kali Linux, Debian Linux, Windows Server 2019/2022, Active Directory, PowerShell, VMware, VirtualBox

Academic Projects

1. **Enhanced RSA Encryption**
   - **Tools/ Techniques:** Manual algorithm design and analysis, paper-based encryption and decryption calculations, logical operations (XOR, AND, OR, modulo), RSA cryptographic principles, ASCII encoding, flowchart creation, academic literature review, theoretical evaluation.
   - **Project Description:** Designed a custom RSA-based cipher with ASCII encoding and Password embedding.
2. **Land Rental System**
   - **Tools/ Techniques:** Python programming using IDLE IDE, file handling and text processing, data structures (lists, dictionaries, tuples, sets), exception handling, modular code design, algorithm development, flowchart creation, report writing, and user input validation.
   - **Project Description:** Developed a Land Rental System for Techno Property Nepal to manage plot rentals and returns via a python application. enabled a rental processing, invoice generation (as text files), and dynamic land availability updates.
3. **IoT-Project – Smart Plant Watering and Monitoring System**
   - **Tools and Techniques:** NodeMCU ESP8266 microcontroller, Arduino IDE for C++ programming, sensor integration (soil moisture sensor, DHT11 temperature and humidity sensor), relay module control, I2C LCD display interfacing, circuit design using Fritzing, system diagram and flowchart creation with Draw.io, hardware prototyping with breadboards and jumper wires, software debugging, and testing.
   - **Project Description:** Integrated ESP8266, DHT11 Sensor, and Relay to automate Plant watering based on temperature and humidity.
4. **Frontend Web Project – Printer Buying E-commerce Website**
   - **Tools/ Techniques:** HTML, CSS, JavaScript, responsive design using Flexbox and Grid, media queries for multi-device compatibility, interactive features with JavaScript (form validation, dynamic content display), and Balsamiq for wireframing and interface planning.
   - **Project Description:** Collaborated with a team to build a responsive website for buying printers.

Certifications

- Cisco Networking Basics
- AWS Academy Graduate – Cloud Operations
- AWS Academy Graduate – Cloud Practitioner
- AWS Academy Graduate – Cloud Architecting
- AWS Academy Graduate – Cloud Foundations
- AWS Academy Graduate – Cloud Security Foundations
- Advanced PowerShell: Automating Active Directory Administration
